THE MAIN AIM AND TOPICS OF THE CONGRESS

The main objective of the Congress is to present a broad spectrum of scientific achievements and technical solutions of the international scientific and R&D communities in the field of armament systems and security technologies. Additional goals of the Congress are discussions concerning contemporary military technology development and its avenues of growth, as well as the consolidation of military, scientific, and industrial communities to build and nurture synergy in their actions. Topics covered by the Congress are as follows:

- ▶ The use of armament and munitions in light of lessons learned from present military conflicts.
- ▶ Novel construction materials and technologies in armament systems.
- ▶ Munitions and explosives.
- ▶ Unmanned weapon platforms (Land, Sea, and Air) and their respective countermeasures.
- ▶ Kinetic and non-kinetic effectors.
- ▶ The influence of sensors on the effectiveness of reconnaissance systems, threat detection as well as assistance in localization and navigation.
- ▶ Artificial Intelligence use in C4ISR systems (Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance).
- ▶ Soldier individual equipment and armament.
- ▶ Armour and ballistic protection.
- ▶ Testing and R&D in the defence industry.
- ▶ Global trends in the development of armament for the upcoming future.
- ▶ Munition safety in operation and storage.
- ▶ Contemporary security science.
- ▶ 25 years of Poland in NATO.
